CONTENTS OF VOLUME 11

Number 1, January 1973

Henry A. Scarton. The Method of Eigenvalleys 1
Emily B. Turner, W. Dallas Adams, and George Emanuel. Numerical Formulation for Constant-Gain Chemical Laser Calculations 15
Flavian Abramovici. The Accurate Calculation of Fourier Integrals by the Fast Fourier Transform Technique 28
Jay P. Boris and David L. Book. Flux-Corrected Transport. I. SHASTA, A Fluid Transport Algorithm That Works 38
Karl G. Guderley and Chen-Chi Hsu. A Special Form of Galerkin's Method Applied to Heat Transfer in Plane Couette-Poiseuille Flows 70
I. Shavitt, C. F. Bender, A. Pipano, and R. P. Hosteny. The Iterative Calculation of Several of the Lowest or Highest Eigenvalues and Corresponding Eigenvectors of Very Large Symmetric Matrices 90
J. Kenneth Shultis. A New Method for the Calculation of the Emergent Distributions for the Anisotropic Slab Albedo Problem 109
John Bentley and Robert F. Stewart. Two-Center Calculations for X-Ray Scattering . 127

Note

K. G. Guderley and R. H. Warren. An Economical Approximation for the Coefficients in the Development of a Function with Respect to an Orthogonal System 146

Number 2, February 1973

J. Oreg. Calculation and Checking of Electrostatic Energy Matrices by Computer . . . 153
J. D. Lyons and R. K. Nesbet. Evaluation of Interals Required in Scattering Theory: II. Exchange Type Integrals 166
R. Afshar, F. M. Mueller, and J. C. Shaffer. Hilbert Transformation of Densities of States Using Hermite Functions 190
Joe D. Hoffman. Accuracy Studies of the Numerical Method of Characteristics for Axisymmetric, Steady Supersonic Flows 210
M. Metcalf and M. Regler. Solution of the Equations of Motion of a Charged Particle in a Stationary Magnetic Field 240
O. Buneman. Subgrid Resolution of Flow and Force Fields 250
Brian G. Stephan and Charles J. Bridgman. Compton Scattering from a Maxwellian Distribution of Electrons in the Discrete S_n Method 269
Terry J. Vander Werff. Periodic Method of Characteristics 296

Number 3, March 1973

O. Buneman. Inversion of Lewis' Poisson Operator 307
D. J. Austen and P. D. Loly. On the Evaluation of Lattice Green Functions and Watson-Like Integrals 315
D. W. Posener. Fast ESR Matrix Diagonalization 326

Derek C. Barker. The Calculation of Potential Gradients in a Moving Normal Region within a Superconducting Thin Film 333
A. A. Amsden and C. W. Hirt. A Simple Scheme for Generating General Curvilinear Grids 348
M. Brettschneider, J. Killeen, and A. A. Mirin. Numerical Simulation of Relativistic Electrons Confined in an Axisymmetric Mirror Field 360
John C. Langeberg and Rex B. McLellan. Interactions Between Vacancies in Rigid Disk Solids 400
Smio Tani and Mitio Inokuti. Modification of the Variation-of-Parameters Method and Integration of the Schrödinger Equation 409
Claude Froeschle and Jean-Paul Scheidecker. Numerical Study of the Stochasticity of Dynamical Systems with More Than Two Degrees of Freedom 423

Notes

Serge J. Zaroodny and Michael D. Greenberg. On a Vortex Sheet Approach to the Numerical Calculation of Water Waves 440
O. Buneman. Analytic Inversion of Nine-Point Poisson Operator 447
M. Yoshimine. Construction of the Hamiltonian Matrix in Large Configuration Interaction Calculations 449

Letters to the Editor

D. Edelson. On the Solution of Differential Equations Arising in Chemical Kinetics 455
A. S. Dickinson. Comparison of the Finite Difference Boundary Value Method and the Cooley–Cashion–Zare Method for Solving One-Dimensional Eigenvalue Equations 458

Number 4, April 1973

Edwin D. Reilly, Jr. Resonant Scattering from Inhomogeneous Nonspherical Targets 463
Mark H. Emery and Glenn Joyce. A Comparison of the Fourier–Hermite and Power Transform Solutions of the Nonlinear Vlasov Equation 493
G. Brant Foote. A Numerical Method for Studying Liquid Drop Behavior: Simple Oscillation 507
G. R. McGuire and J. Ll. Morris. A Class of Second-Order Accurate Methods for the Solution of Systems of Conservation Laws 531
Hiroshi Morihara and Ralph Ta-Shun Cheng. Numerical Solution of the Viscous Flow in the Entrance Region of Parallel Plates 550
John W. White. A New Form of Artifical Viscosity 573
Ray C. Grimm and John L. Johnson. Stability Analysis of Low-Pressure Axisymmetric Toroidal Plasma Simulations 591
Carl S. Ewig and David O. Harris. Matrix Solution of Periodic Mathieu Equations . 606
Douglas G. Fox and Steven A. Orszag. Pseudospectral Approximation to Two-Dimensional Turbulence 612

Letter to the Editor

J. Ross Macdonald. Fitting Experimental Data 620

Author Index 621
